DETAILED ACTION

Reasons For Allowance

I. The following is an examiner's statement of reasons for allowance: Claim 33 has not been rejected using prior art because no references, or reasonable combination thereof, could be found which disclose or suggest an embolectomy catheter system for removing a blood clot comprising: *an outer tube is configured to be axially retractable to remove the constrain on the embolus removal apparatus and whereby the embolus removal apparatus is configured to automatically expand from the collapsed configuration to a deployed configuration upon the axial retraction of the outer tube without requiring axial movement or rotation of a guidewire, and where the embolus removal apparatus comprising a plurality of resilient members having proximal ends configured to freely slide over an inner tube and distal ends fixed to the inner tube and mid portions that are configured to extend laterally away from the catheter body when the proximal ends slide over the inner tube as the embolus removal apparatus achieves its deployed configuration, thereby allowing embolic material to become entangled in the resilient members, where the resilient members are being wrapped around the inner tube in a helical manner when in the collapsed configuration, in combination with the rest of the claimed limitation as set forth in claim 33.*

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
